

KINGSBARN TACTICAL BOND (KDRN)

KDRN INVESTMENT THESIS

The Kingsbarn Tactical Bond ETF (KDRN) seeks to maximize total return by solving for the idiosyncratic and systematic risks associated with fixed income investing. Idiosyncratic (credit) risk strives to be managed by a diversified core of fixed income investments. Systematic (interest rate) risk is solved through actively managing the portfolio's effective duration exposure. We believe the combination of a well-diversified core of bonds with actively managed duration can provide KDRN the unique ability to drive alpha in both inflationary and deflationary interest rate environments.

DURATION MANAGEMENT

KDRN generates active duration determinations through predicting changes in long term interest rates. Through a diversified, multi-dimensional set of predictors KDRN's duration exposure is directionally positioned on the first Friday of every month. This is based on a proprietary investment thesis that continually monitors the primary drivers of interest rates through economic views on macro, valuation, and technical factors.

KDRN Active Duration Framework:

Increase duration exposure during periods of low and deteriorating rates of economic growth / inflation, and/or undervalued bond prices

KDRN Active Duration Framework:

Decrease duration exposure during periods of high and strengthening rates of economic growth / inflation, and/or overvalued bond prices

CORE STRATEGIES

KDRN utilizes a diversified core of bonds which provide the portfolio exposure to a differentiated mix of credit, duration, and yield. The core investments are selected based on historical track record, fee structure, AUM, and liquidity in the market. The main goal of KDRN's Core is to manage credit risk through an investment in over 30,000 fixed income securities. In turn, we believe the Core can provide KDRN with improved market beta with lowered volatility.

KINGSBARN TACTICAL BOND (KDRN)

CURRENT KDRN CORE PORTFOLIO

LQD - The iShares iBoxx \$ Investment Grade Corporate Bond ETF seeks to track the investment results of an index composed of U.S. dollar-denominated, investment grade corporate bonds.

IEF - The iShares 7-10 Year Treasury Bond ETF (IEF) seeks to track the investment results of an index composed of U.S. Treasury bonds with remaining maturities between seven and ten years.

AGG - The iShares Core U.S. Aggregate Bond ETF seeks to track the investment results of an index composed of the total U.S. investment-grade bond market.

HYG - The iShares iBoxx \$ High Yield Corporate Bond ETF seeks to track the investment results of an index composed of U.S. dollar-denominated, high yield corporate bonds.

ANGL - The VanEck Fallen Angel High Yield Bond ETF (ANGL[®]) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the ICE US Fallen Angel High Yield 10% Constrained Index (HOCF), which is comprised of below investment grade corporate bonds denominated in U.S. dollars, issued in the U.S. domestic market and that were rated investment grade at the time of issuance.

MBB - The iShares MBS ETF (MBB) seeks to track the investment results of an index composed of investment-grade mortgage-backed pass-through securities issued and/or guaranteed by U.S. government agencies.

MUB - The iShares National Muni Bond ETF seeks to track the investment results of an index composed of investment-grade U.S. municipal bonds.

BNDX - Vanguard Total International Bond ETF seeks to track the performance of a benchmark index that measures the investment return of investment-grade bonds issued outside of the United States.

EMB - The iShares J.P. Morgan USD Emerging Markets Bond ETF seeks to track the investment results of an index composed of U.S. dollar-denominated, emerging market bonds.

Holdings are subject to change without notice.

IMPORTANT INFORMATION

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the Fund, please call 800.242.1000 or visit our website at KingsbarnCapital.com. Read the prospectus or summary prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. Shares of any ETF are bought and sold at market price (not NAV) and may trade at a discount or premium to NAV. Shares are not individually redeemable from the Fund and may be only be acquired or redeemed from the fund in creation units. Brokerage commissions will reduce returns.

Fund risks: When the Fund invests in Underlying Bond Funds, it is subject to the risks associated with those investment companies, (such as the risk that the fund will be concentrated in a particular issuer, market, industry or sector, and therefore will be especially susceptible to loss due to adverse occurrences affecting that issuer, market, industry or sector). Underlying Bond Funds incur operating expenses that are separate from those of the Fund. As a result, the Fund's shareholders will indirectly bear a proportionate share of the operating expenses of the Underlying Bond Funds, in addition to Fund expenses. While fixed-income securities normally fluctuate less in price than stocks, there have been extended periods of increases in interest rates that have caused significant declines in fixed income securities prices. Junk bonds are speculative, involve greater risks of default, downgrade, or price declines and are more volatile and tend to be less liquid than investment-grade securities. The Fund will use derivative instruments such as futures contracts and the Underlying Bond Funds may use derivative instruments such as swaps, foreign currency exchange forward contracts, futures contracts and options on futures contracts. The value of derivatives may rise or fall more rapidly than other investments. For some derivatives, it is possible to lose more than the amount invested in the derivative. To the extent the Fund invests in Underlying Bond Funds that invest in foreign securities, it may be subject to additional risks not typically associated with investments in domestic securities. The fund is effective as of 11/15/21, but not available for trading until 12/21/21. *Foreside Fund Services, LLC. Distributor.*
